

Electrical Installation Condition Report (EICR)

In accordance with BS 7671 Requirements for Electrical Installations

Company: _____ Date: ____/____/____
Address: _____ Ref: _____

Section A — Details of the Installation

Occupier: _____ Installation Address: _____ Purpose of Report: _____

Date of Last Inspection: _____ Type of Supply: _____ Earthing Arrangement: _____

Section B — Details of the Installation (continued)

Section C — Supply Details

Parameter	Value
Number of phases	
Nominal voltage	
Nominal frequency	
Prospective fault current (kA)	
External loop impedance Z_e (Ω)	

Section D — Observations

Obs. No.	Location	Observation	Code
1			
2			
3			
4			
5			
6			
7			
8			

Observation Codes

- C1 — Danger present. Risk of injury. Immediate remedial action required.
- C2 — Potentially dangerous. Urgent remedial action required.
- C3 — Improvement recommended.
- FI — Further investigation

required without delay.
N/A — Not applicable.
N/V — Not verified (for existing installations).
LIM — Limitation (see Section K).

Section E — Overall Assessment

The overall condition of the installation is considered to be:

& Satisfactory &
Unsatisfactory

Recommended date of next inspection: ____/____/____

Section F — Inspector Details

Inspector Name:

Registration No.:

Signature & Date:
